EXPERIENCE

Mobzway Technologies Dec 2025 – Sep 2026
Software Developer Jaipur, India

- Integrated **5+ third-party games** into client websites, optimizing REST API communication and reducing application latency by **25%**.
- Developed **15+** Super Admin dashboards and modules using React.js, Node.js, Express.js, and MongoDB for game, operator, brand, and configuration management.
- Optimized REST API responses, MongoDB queries, and dashboard data loading, reducing API response time by **32.3%** and dashboard load time by **38%**.
- Designed and developed scalable frontend UIs and backend REST APIs, implementing CRUD operations, authentication, authorization, and role-based access for management workflows.

Bharat Svarga Jun 2025 – Aug 2025
Frontend Developer Jaipur, India

- Built a React-based CRM dashboard handling role-based workflows for 100+ simulated users.
- Developed reusable component architecture reducing duplicate UI code by 35%.
- Implemented centralized state management using Context API ensuring consistent cross-module data flow.
- Delivered responsive Tailwind CSS interfaces improving cross-device compatibility.

Bharat Svarga Mar 2025 – Apr 2025
Full Stack Developer Trainee Jaipur, India

- Learned full-stack development fundamentals by building projects using React.js and Node.js .
- Integrated RESTful APIs into React components to enable dynamic data fetching and rendering.
- Built basic REST APIs using Node.js and Express.js to handle client-server communication.
- Understood core concepts of frontend-backend interaction, including API requests, responses, and JSON data handling.

PROJECTS

Nuzio Personalised Audio News - Link | *React.js, Node.js, Express.js, MongoDB, NewsData.io, Tailwind CSS*

- Built a full-stack personalised audio-news platform using **React.js, Node.js, Express.js, MongoDB** and real-time **NewsData.io** integration.
- Developed niche-based news personalisation with bilingual **English/Hindi** support, live search, bookmarking, and custom audio playback using **Web Speech Synthesis**.
- Implemented **5-minute TTL caching** and backend API proxying to reduce redundant API calls, handle rate limits, and improve response performance.
- Created a responsive **mobile-first glassmorphic UI** with personalised onboarding and persistent user preferences.

CORE SKILLS

Languages : Python, JavaScript, React.js, Node.js, Express.js, MongoDB, Socket, Redis
Core CS : OOP, Operating Systems, Computer Networks
Tools : Git, GitHub, Postman, MongoSH, VS Code, Antigravity

EDUCATION

Vivekananda Global University Aug. 2023 – Jun. 2026
Bachelor of Computer Applications – AI & Data Science Jaipur, India

- **CGPA**: 7.8
- **Achievements**: Solved 250+ DSA problems on **LeetCode/praveshaggarwal** (Contest Rating: 1572) and **GFG/praveshagxqez** (College Rank: 34)
- **Hackathons**: CODE RED 3.0 & 4.0, IIT Bombay E-Cell Bootcamp, National Project Exhibition
- **Certifications**: AWS Cloud Foundations, EXIN AI Essentials, Generative AI, HackerRank React, Generative AI Literacy
